Sir:

In response to the Office Action dated January 27, 2003, please amend the above application as follows:

IN THE ABSTRACT

Please insert the following Abstract of the Disclosure as appropriate:

21
An expression library comprising a repertoire of nucleic acid sequences cloned from a non-immunised source, each nucleic acid sequence encoding at least part of a variable domain of a heavy chain derived from an immunoglobulin naturally devoid of light chains and its use in producing antibodies, particularly fragments thereof, is disclosed. The invention provides a method for preparing antibodies, or fragments thereof, having a specificity for a target antigen which avoids the need for the donor previously to have been immunised with the target antigen.
